

# Installation Guide

1. Open the zip file / cloned project  
GitHub Repo: [https://github.com/huiern214/Flight\\_Ticket\\_Booking\\_System](https://github.com/huiern214/Flight_Ticket_Booking_System)
2. Server (backend): Run  
`/Flight_Ticket_Booking_System/server/src/main/java/com/flyease/server/ServerApplication.java`

3. Client (frontend):
  - a. Install [Node.js](#)
  - b. Open terminal and run below commands

```
// go to the directory /Flight_Ticket_Booking_System/client
cd client

// install the library need for frontend
npm install react-scripts --save

// start the client
// Can visit http://localhost:3000 to view the Flight Ticket Booking
System
npm start
```

4. To access some functionalities of the Flight Booking Website, an account is required.
